

Worksheet 2: Poster checklist and peer-review form

Each poster should include the following information:

title, authors, research question, picture of the theoretical models, research methods, results with a picture of the proposed model, conclusion, and limitations.

Use the checklist below to ensure that all parts are included. Each “Yes” scores one point.

Poster section	Yes	No
Title		
Authors		
Research question		
A picture of the theoretical models		
Description of the research method		
A picture of the proposed model(s) after testing		
Limitation(s) of the model(s)		
Subtotal A		

Score the following sections using these criteria:

0: absent, unclear, vague, or wordy

1: somewhat clear and relevant

2: very clear and relevant to the task

Poster section	Score
The steps taken to test the hypothesis are described in enough detail for the experiment to be repeated by another person.	
The results are presented clearly. They are concise and relate directly to the hypothesis being tested.	
The conclusions are stated clearly and concisely. They are well supported by the data collected.	
The limitations of the experiment are described clearly.	
The poster is attractive. It is easy to read, and the information presented is easy to understand.	
Subtotal B	

Subtotal A + subtotal B = **total:** _____
